Gravel Crushing in conjunction with the US Forest Service – There was discussion on crushing gravel at the 191 pit, however the quantity that was being requested was too large. The Town of Grand View was interested in getting some material as well, which would lessen the amount needed for the Town of Namakagon. The amount was a minimum to get Haas Inc. to come and crush. If the Town of Grand View went in on the crushing, then 191 pit could be used. There was discussion on how much material (25,000 ton) was available in the 191 pit.
